Re: Proposed roadway for Shawnee Valley Planned Residential Development (PRD)

Dear Supervisors:

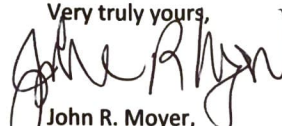

The developers of the Shawnee Valley PRD met with the Board of Directors of the Shawnee Fire Company on June 8, 2021. They were looking for our input on two alternative roadways leading from Hollow Road to the residential units to be constructed between Sun Mountain Lake/ Shawnee Lake and Mount Nebo Road.

- Option 1 would be a single lane 'Emergency Vehicles Only' drive built across Shawnee Lake dam. This road would be equipped with a secured gate to ensure access only by emergency vehicles. The new roadway would intersect with Hollow Road in the vicinity of the Shawnee Fire House.
- Option 2 would consist of a two lane road across the Shawnee Valley dam. It would permit in and out access to the community by residents and members of the public and would not be gated. It would intersect Hollow Road just north of the existing entrance to Sun Mountain Club.

Both roads would intersect with the current Shawnee Valley Drive.

Of the two options presented to us, the Shawnee Fire Company finds Option 2 to be the better alternative. It provides safer and more reliable access by emergency vehicles, permits a reasonable response time to the current and planned PRD, and actually reduces the time it would take us to respond to emergencies on Mt. Nebo Road.

Very truly yours,

John R. Moyer,
Secretary
